

Amir Aliu

✉ amiraliuks@proton.me | 📍 Gjilan, Kosovo | 🌐 <https://amiraliu.vercel.app>

Summary

Cybersecurity practitioner focused on vulnerability research, offensive security, and competitive CTF environments.

Cybersecurity & Security Research

Kosovo Cyber Team

kosovacyber.team

Participant

- Selected for national-level cybersecurity training program preparing for international competitions
- Specialized in Reverse Engineering (primary) and Web Security (secondary)
- Participated in national CTF competitions and team-based challenges
- Engaged in Attack & Defense (A&D) exercises simulating real-world offensive and defensive scenarios
- Collaborated in joint activities with international cybersecurity teams
- Trained in exploitation techniques, binary analysis, and coordinated team operations

Camaleon CMS

February 2026

Independent Security Researcher

- Discovered and responsibly disclosed multiple high-impact vulnerabilities in Camaleon CMS
- Identified and validated vulnerabilities including Remote Code Execution (RCE), SQL Injection, SSTI, and Stored XSS
- Developed proof-of-concept (PoC) exploits, demonstrating real-world impact
- Demonstrated attack paths including privilege escalation and application compromise
- Findings are currently under responsible disclosure

IoT Camera Security Research

March 2026

Independent

- Conducted security analysis of a consumer IoT surveillance device
- Identified and validated potential vulnerabilities in network exposure, authentication, and communication mechanisms
- Performed traffic analysis and reverse engineering to evaluate device behavior and attack surface
- Research is currently unpublished and under review for disclosure

KSAL Cyber Team

2026 - Present

Core Member & Contributor

- Early member of a competitive cybersecurity team focused on CTF participation and collaborative research
- Contributed to team infrastructure, including development of a Discord bot and team website
- Participated in team-based CTF competitions, contributing to multiple top placements
- Supported team visibility through content creation and LinkedIn outreach
- Collaborated with teammates on challenge solving and knowledge sharing

CTF Competitions

BlueHens CTF 2026

University of Delaware

Participated as a team under KSAL Cyber Team, finished in 6th place with 3839 points.

ApoorvCTF 2026

IIIT Kottayam

Participated as a team under KSAL Cyber Team, finished in 4th place.

VishwaCTF 2026

CyberCell VIT

Participated as a solo player with a focus on reverse engineering challenges per our Kosovo Cyber Team coach's reverse engineering cyllabus guidance.

THJCC CTF 2026

HITCON, NCSE Network

Participated as a team under KSAL Cyber Team, finished in 4th place.

Love at First Breach - CTF 2026

TryHackMe

Love at First Breach - Advanced Track 2026

TryHackMe

Advent of Cyber 2025

TryHackMe

Experience

writeupify.app

Founder & Full-Stack Developer

Remote
2026 - Present

- Built a collaborative platform for cybersecurity writeups with scalable backend architecture
- Designed features for team-based research, content sharing, and structured vulnerability documentation
- Focused on secure development practices and performance optimization

Freelance Web Developer

Independent

Remote

- Developed and maintained websites for communities and SMB clients
- Delivered responsive, user-focused applications with ongoing support
- Implemented backend systems and database integrations

Independent

Community Manager, Developer, and Systems Administrator

Remote
2014 - 2021

- Managed and developed gaming communities with high-availability servers
- Built custom game systems, automation tools, and backend services
- Optimized performance, uptime, and infrastructure reliability

Musa Zajmi

Technical Support Volunteer

Gjilan
2013-2018

- Provided IT support for school systems, devices, and users
- Assisted in deployment and maintenance of classroom technology

Education

Universum College

Computer Science

Bachelor
2021 - Paused

Zenel Hajdini

Socio-linguistic Studies

High School
2018 - 2021

Skills

Languages & Frameworks

Python, JavaScript (Node.js, React, Next.js)

Databases

MySQL, PostgreSQL, Microsoft SQL Server, MongoDB

Operating Systems & Servers

Windows (Desktop/Server), Ubuntu, Kali Linux, Docker, VMware

Development & DevOps Tools

Git, Visual Studio, VS Code, Postman, SQL Server Management Studio

Security & Networking Tools

Wireshark, Nmap, Burp Suite, Gobuster, ffuf Metasploit, Hydra, John the Ripper

Certifications

Introduction to Cybersecurity A.U.K Training and Development Institute	14 April 2026
Pre Security TryHackMe	22 February 2026
Hardware and Upgrade Support Cisco	11 September 2025
Security and Connectivity Support Cisco	10 September 2025
Operating Systems Support Cisco	09 September 2025
IT Customer Support Basics Cisco	31 September 2025
Python Essentials 1 OpenEDG Python Institute	1 January 2025
Introduction to Cybersecurity Cisco	15 June 2024
NDG LINUX UNHATCHED ENGLISH 0723B Cisco Networking Academy & Network Development Group	30 July 2023
